

THE LONG-ACTING THERAPEUTICS PATENTS AND LICENCES DATABASE

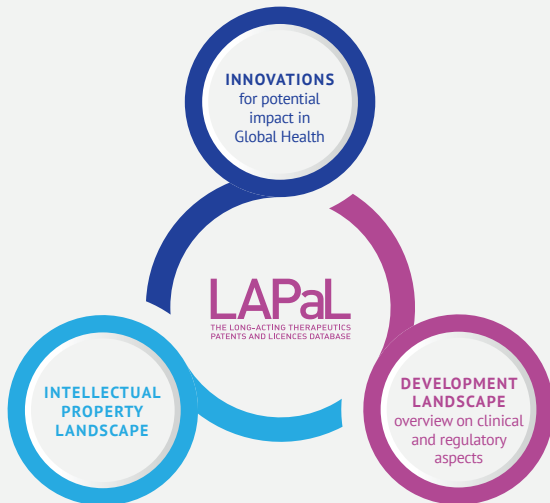

A collaborative tool to support access to innovative long-acting therapeutics

LAPaL is a free online resource that provides innovation and access support on technical features, development status and intellectual property status of selected long-acting therapeutics that could have impact in low- and middle-income countries.

WHAT ARE LAPaL'S MAIN COMPONENTS?

Long-acting technologies and compounds

THE LONG-ACTING THERAPEUTICS ONE-STOP-SHOP

Long-acting therapeutics development landscape with technologies, compounds and their co-formulations

Visualisation dashboard:
- Insights on clinical trials
- Overview of regulatory status

Intellectual property landscape

Access commitments for pipeline acceleration

Scope

Initial focus on therapeutics with potential impact for global health, such as those developed for HIV prevention and treatment, tuberculosis, viral hepatitis and malaria

Sources

Evidence-based and carefully curated by a team of experts based on reliable public sources of information with potential additional contribution and validation certificates from innovators
