

MedsPal Release Note 1 – 07 May 2024

medicines patent pool

The new version of MedsPaL released in May 2024 is a major update to the interface first released in 2016. It provides users with an enhanced experience introducing a host of new features, tools and design, and broadened database scope and expanded information.

Database Scope

In addition to medicines, MedsPaL now also includes patent and licence information on the following products:

medicines

- Vaccines: The database covers COVID-19 vaccines that received Emergency Use Listing from the World Health Organisation WHO until 31 December 2022. The information was previously available on a separate platform called VaxPaL, MPP's former COVID-19 vaccines patent database.
- **Technologies**: Long-acting technologies included in LAPaL, the Long-Acting technologies patents and licences database, a free online resource coordinated by MPP.

For vaccines and technologies, MedsPaL includes patent information **for all countries**.

All products chip at the top of the main page is selected by default allowing the search for Medicines, Vaccines, and Technologies. Users can restrict the search to specific products by selecting the corresponding chips at the top of the main page:

New Design & Functional improvements

ABOUT

From the top banner, you Can access the **About** menu with information on the database, including e.g. FAQs, and Useful Resources.

Licences Tab

Searches may be performed under **Table** or **Reports** views and the user may switch between the **Patents** and new **Licences** tabs to view the results.

Pop-ups

Information pop-ups are available throughout by following the **(**) or clicking on tags

Search dropdowns & multiple selection

Items are selected from the lists by using checkboxes. Selected items appear as tags in the input box and at the top of the dropdown lists under the *Current selections* section.

Toggle All is used to select or unselect all items in a list.

Status categories

Throughout its life term, a patent application/patent will go through several main states captured in MedsPaL under Patent Status. These states can be grouped under three categories: **Filed**, **Granted** and **Not in force** as follows:

Patent Status	Status Category - used in Reports view	Highlight used in Table/Patents
Filed Filed (opposed) Rejected - under appeal Restoration filed	Filed	Yellow Filed (Opposed)
Granted Granted (claims amended) Granted (opposed) Restored Term extended Term extensions filed	Granted	Green Granted Restored
Expired National Phase entered Not filed Rejected Revoked Withdrawn	Not in force	Grey Withdrawn

Example:

Jurisdiction @	Product Name @	Product Type @	Patent Description @	Patent Status 🛛	Application Number @	Expiry Date @	Last Updated @
*) China	Ibrutinib 140 mg	Medicine Small molecule(s)	Ibrutinib compound and analogues and their uses to treat cancers	Granted	CN201010162270	28/12/2026	31/03/2024

			Ibrutinib to treat or prevent graft versus host disease	Granted	CN201480068676	24/10/2034	31/03/2024

New Information

Information on health products' clinical development status, dosage form and route of administration and on countries' region and World Bank income classification is now available on the **Patents** result table: Newly available information includes:

For Jurisdictions: World bank income group and regions

For products:

Development status Paediatric indication Dosage form Product type and sub-type Route of administration Originator(s) For Patents: Applicant(s)

New Licences Tabs

In addition to being shown in the patents results table, **Licences** are also shown in a dedicated new tab on both the **Table** and **Reports** views. When performing a search on one or multiple products, the user can switch between the Patents and Licences tabs. Jurisdictions are broken down by region:

Type of Licence is a newly displayed information available as a separate column in the results table and as a new field in the **Licence cards.**

Users can now also search for Licence information using the following criteria: Type of Licence, Product, Jurisdiction, Licensor, and Licensee.

Bil	ateral Licence On De	elamanid (Mylan)	×
٢	Type Bilateral Licence	Licensor Otsuka	
	-	📕 a, Algeria, Angola, Bangladesh, Belize, Benin, Bhutan, Bolivia (Plurinational State of), Bosnia	
	Republic, Chad, Cole	otswana, Brazil, Burkina Faso, Burundi, Cabo Verde, Cambodia, Cameroon, Central African Iombia, Comoros, Congo, Congo, democratic Republic of the, Costa Rica, Côte <u>see more</u>	
	Licensee(s) Mylan		

New Feature- Advanced Filters

In addition to the simple search by Product name, Jurisdiction and/or Keyword, the new **Advanced filters** section provides the user with additional search options related to:

- Patents: Patent status (e.g. expired, granted, filed)
- Jurisdictions: Income group and Region
- **Products**: **Route of administration**, **Dosage form**, **Disease Area**, **Originator(s)**, **paediatric indication**, and **EML** (inclusion in the Model lists of Essential Medicines of the World Health Organisation (WHO EML)
- Licences: Licence type, Licensor and Licensee
- Regulatory Data exclusivity expiry date

New Feature- Save Search and Run Alerts

In the Table view, users can save their searches and enable e-mail updates to be notified of changes to those results. Types of changes that may trigger an e-mail notification include changes in patent status, a newly associated patent or agreement, or the addition of Data Exclusivity information. A user account is required, and users will be prompted to create one the first time they attempt to save a search. An account may be set up directly as follows:

To set up an account:

1. Click on "Login" on the top banner to open the Login form	MPP About Login () Help Reports To set-up an account or login, click here
2. Click on "Sign up for an account" to open the Sign-up form.	X Login Login to your Medspal Account Email Password Password Cogin Eligin Bign up for an account
3. Fill-in the Sign-up form	Sign Up Sign up for MedsPaL First Name Password Password Instruction Instruct
4. Once you submit the form you will get a confirmation message	A confirmation email has been sent X Please check your email for confirmation instructions.
5. You will receive a confirmation e-mail from: noreply@medspal.org	Confirmation instructions

To save and update your search:

1. Run a search and click on "save search". If not already logged-in, you will be asked to "Login". Enter your credentials or create a new account

New Design & Information- Report View

medicines

MAP VIEW has been replaced by **REPORTS** that allows some analysis of patent and licences associated with a Product through interactive maps, donut charts, and timelines.

- → Start by selecting a **Product** in the dropdown list and click on **Generate Report**.
- → The resulting Patent and Licence information will be distributed on two different tabs: Patents & Licences

All products Ø Medicines (Low and middle income) Ø Vaccines (Worldwide)	Technologies (Worldwide)
Table	Reports
Molnupiravir 200 mg Ø 1. Select a Produc	ct and Generate Report
	cents and Licences results are blayed in two separate tabs
	Select one or more Income Groups:

Patents tab - Interactive Map

All patent applications and granted patents associated with the selected product are shown by default on a map. You can:

- filter results by Income Group or a specific Jurisdiction.
- select whether to display all patents or only those covering the compound (for medicines only).
- select countries directly from the Map.

When a **Jurisdiction** is selected, the country will be highlighted in purple and related patents will be listed on the right with links to patent cards.

Click on the "i" icon to expand and view the map legend and the shades of colours used:

Patents tab - Summary of Patent Statuses for Family by Region

List and donut chart show the distribution of patents/patent applications for all patent families associated with the selected product by status category (Granted, Pending/Filed, Not in force) and by regions.

A specific family may be selected by the user by using the drop-down menu to the right.

The **Donut chart** is divided by **regions** shown in different colours. Colour gradient relates to patent status categories: darker colours are for active status and lighter colours are for inactive status. You may hover over a slice of pie to see detailed statuses.

Annea		

Patents tab - Timeline of Patent Families

Patent families associated with the selected product are shown by filing year. with WIPO (Patent Cooperation Treaty international patent applications) shown by default. A specific jurisdiction may be selected by using the drop-down menu to the right.

All licences associated with the product are displayed by default. You can:

medicines

- filter by licence name (via single or multiple selections)
- select a specific jurisdiction directly on the map and associated licences information will be listed on the right with link to Licence cards.

Click on the "i" icon to expand and view the map legend and the shades of colours used.

Licences tab – Licences table

Under this section, the licences associated with the chosen product are listed with detailed information including title, type of licence, jurisdictions, licensor and licensee. Clicking on the licence title opens the Licence card:

Dolutegravir 50 mg Covered Under Licences:					
Licence 0	Type of Licence	Product Type 🛛	Jurisdictions 🛛	Licensor 0	Licensee 0
Bilateral Licence on Dolutegravir (DTG) and DTG/ABC combinations	Bilateral Licence	 Medicine Small molecule(s) 	East Asia & Pacific Cambodia, Indonesia, Kiribati, Korea (Democratic People's Republic of), Lao People's Democratic Republic (the), Micronesia (Federated States of), Mongolia, Myanmar, Papua New Guinea, Philippines, Samoa, Solomon Islands, Timor-Leste, Tuvalu, Vanutu, Viet Nam	Viiv	Aurobindo
			Europe & Central Asia Armenia, Georgia, Kosovo, Kyrgyzstan, Moldova, Republic of, Tajikistan, Turkmenistan, Ukraine, Uzbekistan Latin America & Caribbean		

Patents and Licences maps can be **exported** as PNG, the full report as **PDF.** The search can also be **shared** as link.

Print to export/save the Patent or Licence reports in PDF format or Export to save the maps as a PNG image on your computer:
