

# GENDER & HEALTH INDEX REPORT CARD

Does Medicines Patent Pool (MPP) support gender equality? The Gender & Health Index measures the performance of 198 organisations active in global health on their gender-related policies and practices.

The Index reviews ten variables which assess performance across two interlinked dimensions of inequality: inequality of opportunity in career pathways inside organisations and inequality in who benefits from the global health system. This is a summary of how Medicines Patent Pool (MPP) has performed since 2018.

## MEDICINES PATENT POOL (MPP)

### MEDICINES PATENT POOL (MPP)

Total number of greens / ambers / reds

### HOW DOES THIS COMPARE?

Across 198 organisations:

Average number of greens / ambers / reds

## KEY

-  Good practice: meets all or many of the criteria for this variable
-  Room for improvement: meets some of the criteria for this variable
-  Below standard: does not meet the criteria for this variable
-  No data: policy or data not publicly available or shared with GH5050
-  Male representation
-  Female representation
